America Counts Math Tutoring

What is America Counts?

America Counts is a federal initiative designed to improve math education. We do our part by providing quality math tutors to children in the Oberlin Public schools. The individual attention our tutors supply helps students master the math skills they need to succeed.

What is Oberlin Community Services?

Oberlin Community Services (OCS) is a social service agency serving low-income persons in Oberlin and southern Lorain County. America Counts math tutoring is only one of many services we provide to the community.

How can I help?

After-School Tutoring

Our 4th Grade After-School Math Program matches tutors with one or two students to work with for the entire semester. We provide curriculum materials and training, and you provide enthusiasm and dedication. Tutors must be available Mondays and Wednesdays from 3:00-5:15.

In-Class Tutoring

In-class tutors work with teachers in math classrooms in grades 3-8. Tutors work with individual students, answer questions in the classroom, and generally assist with learning. Tutoring slots are available throughout the school day.

Why should I apply?

- You will have a profound impact on a child's life.
- You will be paid competitive rates for tutoring if you receive federal work-study. The predictable hours nicely complement a busy academic schedule.
- You will receive valuable training and mentoring, so no experience is necessary.
- You will engage with the greater Oberlin community.
- You will enhance your own confidence in math by teaching basic concepts to children

How do I apply?

Please fill out and return the Oberlin Community Services/America Counts application on the back of this page by the deadline, September 3rd. Successful applicants will receive a request for interview via e-mail. Interviews will be held during the first week of September. Feel free to contact Sydney Olson, Tutoring Coordinator, with any questions or concerns at 440-774-6579 or at americacounts@oberlin.net
