

Current Funding:

NSF Collaborative Research for Undergraduate Institutions: *Effects of migratory stress and breeding hormones on the spring recrudescence of latent West Nile and eastern equine encephalitis virus infections in the gray catbird.* Collaborators: Jennifer Owen and Frank R. Moore, University of Southern Mississippi.

Ohio EPA Environmental Education Fund: *Vermilion River Watershed Educational Book.* This project, designed to highlight the Vermilion River and foster its stewardship, is in cooperation with the Western Reserve Land Conservancy and 14 other government and private land protection agencies. Jan Cooper (Rhetoric and Composition) and I serve as co-editors of this collection of essays written by local scientists, farmers, government officials, and students. To be completed in the summer of 2008.
