

Jason Evan Stalnaker

CURRENT POSITION	Professor of Physics Longman Professor of Natural Sciences Department of Physics & Astronomy Oberlin College 110 N Professor St. Oberlin, OH 44074	<i>Phone:</i> (440)775-8336 <i>E-mail:</i> jason.stalnaker@oberlin.edu
RESEARCH INTERESTS	High-precision atomic spectroscopy, Precision tests of fundamental physics using atomic systems, Atomic magnetometry, Femtosecond frequency combs, Optical frequency standards.	
EDUCATION	University of California at Berkeley , Berkeley, California <ul style="list-style-type: none">• Ph.D., Physics, May 2005 Dissertation Title: “Progress Towards Parity Nonconservation in Atomic Ytterbium” Advisors: Dmitry Budker and Stuart J. Freedman• M.A., Physics, December 2000• B.A., Physics with Highest Honors, May 1998 Minor in Mathematics	
HONORS AND AWARDS	Oberlin College Donald R. Longman Professor of Natural Sciences, July 2023 - Present Oberlin College Awarded Research Status, 2020/21 Academic Year Oberlin College Faculty Excellence in Community Engagement Award, 2017 Oberlin College W.M. Keck Foundation Fellowship in the Natural Sciences, 2010 Oberlin College Professor Props Faculty Recognition Nominee, 2008 & 2017 University of California at Berkeley Outstanding Graduate Student Instructor Award, 2002 University of California at Berkeley Helmholtz Scholar, 1999	
ACADEMIC EXPERIENCE	University of California at Berkeley , Berkeley, California Department of Physics <i>Undergraduate Research</i> September 1996 - May 1998 Performed high-precision laser spectroscopy of ytterbium atoms in support of atomic parity nonconservation experiment.	

University of California at Berkeley, Berkeley, California

Graduate Research

June 1998 - May 2005

Conducted spectroscopic measurements of ytterbium atoms with the goal of detecting parity nonconservation. Investigated spin relaxation of alkali atoms in paraffin-coated vapor cells in order to evaluate feasibility of developing improved small-scale atomic magnetometers and clocks.

Student Teaching

August - December 1998; January - August 2002

Graduate-student instructor for introductory physics course geared towards life-science majors. Led discussions, laboratory sections and held course-wide office hours. Received Outstanding Graduate Student Instructor award in May of 2002.

PROFESSIONAL
EXPERIENCE

University of California at Berkeley, Berkeley, California

Department of Physics

Postdoctoral Researcher

May 2005 - August 2005

Continued graduate work on the experimental investigation of atomic parity nonconservation in ytterbium and worked on studying vapor-cell atomic magnetometers and clocks in Professor Dmitry Budker's group.

National Institute of Standards and Technology, Boulder, Colorado

National Research Council Postdoctoral Fellow

October 2005 - July 2007

Worked in the Leo Hollberg's Optical Frequency Measurements Group within the Time and Frequency Division. Developed and expanded spectroscopic techniques using femtosecond frequency combs. Researched and performed optical frequency synthesis for optical-optical and optical-microwave frequency comparisons. Worked on the ongoing development of an optical frequency standard based on atomic ytterbium confined within an optical lattice. Supervisors were Scott Diddams and Chris Oates.

Oberlin College, Oberlin, Ohio

Department of Physics & Astronomy

Donald R. Longman Professor of Natural Sciences

July 2023-Present

Professor

July 2020-Present

Chair of Physics & Astronomy Department

July 2021-July 2023

July 2018-June 2020

Associate Professor

July 2013-June 2020

Assistant Professor

July 2007-June 2013

Courses Taught

- Physics 058: *The Charm and Strangeness of Particle Physics*
- Physics 104: *Elementary Physics II Laboratory*
- Physics 110: *Mechanics and Relativity Workshop and Laboratory*
- Physics 111: *Electricity, Magnetism, and Thermodynamics*
- Physics 242: *Electronics*
- Physics 310: *Classical Mechanics*
- Physics 311: *Electricity and Magnetism*
- Physics 312: *Quantum Mechanics*
- Physics 314: *Intermediate Laboratory*
- Physics 316: *Waves and Optics*
- Physics 410: *Statistical Mechanics*
- Physics 411/412: *Electrodynamics/Applied Quantum Mechanics*
- Physics 418: *Laboratory Physics*

Research

High-precision spectroscopy of atomic systems using femtosecond frequency combs.
Precision atomic magnetometry as applied to fundamental physics tests.

Grants and Funding

- Awarded the National Institute of Standards and Technology Precision Measurements Grant for “Precision Spectroscopy of Cold Lithium Atoms with a Femtosecond Frequency Comb” (\$150,000 October 2008 - September 2011)
- Awarded Grant-in-Aid from Oberlin College for “Direct Frequency-Comb Spectroscopy of Atomic Potassium” (\$1,500 January 2013 - June 2013)
- Awarded a National Science Foundation RUI Grant #1305591 for “Precision Spectroscopy of High-Lying States of Atomic Lithium” (\$140,000 August 2013 - August 2016)
- Awarded a National Science Foundation Collaborative Research RUI Grant #1707803 for “Search for Exotic Transient Spin-dependent Signals from Ultralight Dark Matter Fields” (\$235,028 to Oberlin College May 2017 - May 2020)
- Awarded Research Status from Oberlin College for the 2020 - 2021 academic year
- Awarded a National Science Foundation Collaborative Research RUI Grant #2110370 for “Searches for Ultralight Bosonic Dark Matter with Atomic Magnetometer Networks” (\$276,320 to Oberlin College September 2021 - August 2024)

Honors Projects Supervised

- Sean Bernfeld: “Stabilization of a Femtosecond Laser Frequency Comb” (2009)
- William Striegl: “Two-Photon Transitions in Potassium” (2010)
- Jacob Baron: “Precision Spectroscopy of Atomic Lithium with an Optical Frequency Comb” (2012)
- Sophia Chen: “Two-Photon Direct Frequency Comb Spectroscopy of Rubidium” (2012)

- Michael Rowan: “Doppler-Free Saturated Fluorescence Spectroscopy of Lithium Using a Stabilized Frequency Comb” (2013)
- Donal Sheets: “Precision Spectroscopy of Atomic Lithium” (2015)
- Peter Elgee: “Progress Towards Cooling of an Atomic Beam of Lithium” (2016)
- Hannon Ayer: “Two Photon Direct Frequency Comb Spectroscopy of Atomic Potassium” (2017)
- Sun Yool Park: “Construction of a Single Beam SERF Magnetometer using Potassium Atoms for GNOME” (2019)
- Perrin Claire Segura: “Soliton Star Analysis for the Global Network of Optical Magnetometers for Exotic Physics (GNOME)” (2020)
- Dhruv Tandon: “Excess Power Analysis Method for the Global Network of Optical Magnetometers for Exotic Physics (GNOME)” (2022)
- Eduardo Castro Muñoz: “Design and Construction of an Induction Coil Magnetometer for the Advanced SNIPE Hunt” (2023)
- Heather Pearson: “Building and Modeling a Nuclear Spin Oscillator for the Detection of Ultralight Dark Matter” (2023)

Oberlin College Service

- Co-coordinator of Science Fridays at Oberlin College (Spring/Fall 2008)
- Panel Member for the Oberlin College Creativity & Leadership Project’s Creativity Fund (2008)
- Member of the Oberlin College Science Advisory Committee (Fall 2008-Spring 2010; Spring 2011-Spring 2013, Fall 2014-Spring 2016, Fall 2018-Spring 2020)
- Member of Oberlin College Judicial and Community Review Board (Fall 2011-Spring 2013, Spring 2014-Spring 2018, Fall 2019 - Spring 2020)
- Member of Oberlin College Academic Standing Committee, (Fall 2015-Spring 2020, Fall 2021 - present; Committee Chair (Fall 2016, Fall 2017-Spring 2020, Fall 2021 - present)
- Member of Oberlin College Honor Code Committee (Fall 2016-Spring 2017)
- Member of Oberlin College Committee on Undergraduate Research (Fall 2017-Spring 2019)
- Faculty Mentor for the Science and Technology Research Opportunities for a New Generation (STRONG) Program at Oberlin College (2015, 2016, 2018, 2019, 2021, 2022, 2023)
- Inside Reviewer for Oberlin College’s Studio Art Program Review (Fall 2019-Spring 2020)
- Program Director of Oberlin College’s 3-2 Engineering Program (July 2022 - May 2024)

Professional Service

- At-Large Member of the Executive Committee of the American Physical Society Group on Precision Measurements and Fundamental Constants (April 2013-May 2016)
- Chair of the session on “Atom Interferometry and Precision Measurements” at the Division of Atomic, Molecular and Optical Physics Meeting (2014)
- Served on National Science Foundation Funding Panel (2018, 2019)

- Reviewer for numerous journals including *Physical Review Letters*, *Physical Review A*, *Optics Letters*, and *Nature*.

Helmholtz Institute, Mainz, Germany

Visiting Scientist

June 2017 - July 2017

Worked with Dmitry Budker's group on precision atomic physics experiments including atomic parity nonconservation and optical magnetometry.
