At Edelman’s CSR & Sustainability practice, Amanda Medress works alongside Fortune 500 companies to create, implement, and communicate sustainability strategies on issues including supply chain, environmental target setting, and employee engagement. She is also co-chair of Roosevelt Pipeline Chicago, a professional development group for civically engaged millennials. As a graduate of Oberlin College’s Environmental Studies and Creative Writing programs, Amanda co-founded the Student Experiment in Ecological Design, the first house in America to monitor its carbon footprint in real time. Additionally, Amanda has authored and illustrated an environmental children’s book, *Quaid McQueen, Trash Machine*, and is a certified conflict resolution practitioner. She has a global perspective that includes experience in Australia, Israel, El Salvador, Vietnam, and Thailand.

Amanda joined OCDC as a freshman in January 2006.

“I’m grateful to OCDC for teaching me critical communication skills, including how to listen (both to what is and what is not being said), how to repeat back, and how to seek out and balance multiple voices.”
