The balance in your HSA Investment Account is subject to investment risks, including fluctuations in value and the possible loss of the principal amount invested. Investing through the WealthCare Saver investment platform is subject to the terms and conditions of the Health Savings Account Custodial Agreement and any applicable investment supplement(s). For information regarding underlying investment expenses, earnings, and distributions, see the applicable investment prospectus and other publicly available information.

WealthCare Saver, a dba of Alegeus Technologies, LLC, is a licensed Non-Bank Custodian of HSA cash accounts.

CapFinancial Partners, LLC ("CAPTRUST") is an investment adviser registered under the Investment Advisers Act of 1940. CAPTRUST acts as investment advisor with respect to the investments available in your HSA. In addition, you may choose to have CAPTRUST manage your HSA account on a discretionary basis.

DriveWealth, LLC, a registered broker dealer and member of [FINRA](#) and [SIPC](#). SOC 2 Type 2, GDPR, CCPA compliant. Registered in all 50 U.S. states.

Welcome

You made a smart choice in selecting a health savings account (HSA)! Now it's time to take advantage of the investment opportunity that comes with your HSA to grow your account and save for your future. We're making it easy for you to get the investment experience that's just right for you, whether you're a new or seasoned investor. Within this guide, you'll learn how to enroll, set up and manage your investments.

HSA investments 101

Planning for healthcare costs in retirement

The average couple can expect to spend \$300,000 on out-of-pocket healthcare costs during retirement, including Medicare premiums, gap coverage, expensive medications, and more.¹ Investing your HSA can help you build a nest egg and ensure you have enough money set aside for the future.²

Once your HSA reaches the required minimum balance, you can begin to build wealth and save for retirement by investing your funds, just like a 401(k). But unlike a 401(k), you **never pay taxes** on earnings or withdrawals for qualified medical expenses! HSA contributions offer greater tax savings than 401(k) contributions and give you the potential to save at a faster rate.

Key things to know before getting started

- **Minimum balance:** You will need to accumulate a minimum balance in your HSA cash account before you are able to invest. Any funds above this threshold can be invested. To see your minimum balance requirement, log in to your HSA portal and click on the 'investments' button within your *HSA account summary*.
- **Transferring funds:** If you have unexpected medical costs, you can transfer your investment funds back into your HSA at any time. There are no fees or penalties for withdrawing money from your investments to pay for qualified medical expenses.
- **Industry-leading solution:** Enjoy an innovative and modern investment experience that provides access to different investment account types, real-time investment account opening and trading, and modern investment tools.
- **Online account management:** You can manage your investments online via your mobile phone, desktop computer, or tablet – from the same place you manage your HSA!
- **Flexible options:** Choose from a variety of investment options that fit your needs, whether you're a new or seasoned investor: [Managed](#), [Self-Directed](#) or [Brokerage](#).

²Investments in securities through the HSA investment account are:
Not FDIC insured | May lose value | No bank guarantee

Opening an investment account

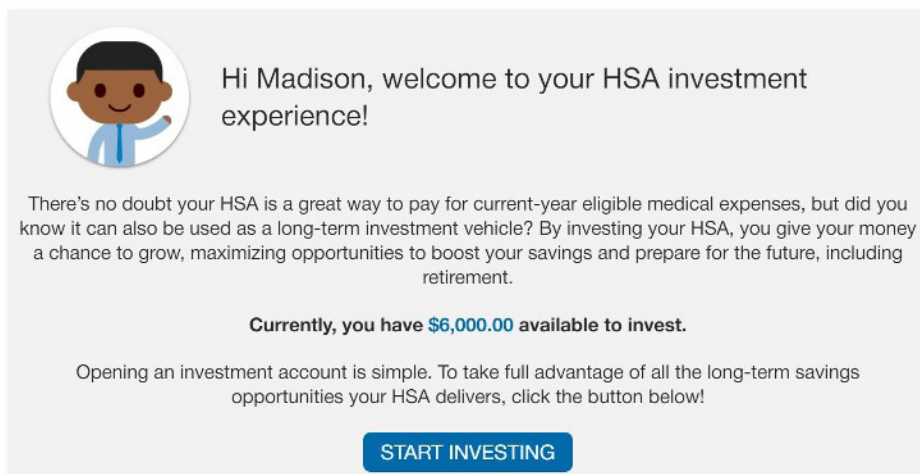

Follow the steps below to open your HSA investment account.

1. Log in to your HSA portal.
2. Expand the menu and click 'investments' or navigate to your HSA account summary and click on the 'investment' button.

3. Click on the 'start investing' button.

***Note:** you can only proceed with the next steps if you have achieved the minimum required balance in your HSA and the market is open (Monday – Friday, 9:30 a.m. – 4:00 p.m. ET).

Able to invest

Hi Duke, welcome to your HSA investment experience!

There's no doubt your HSA is a great way to pay for current-year eligible medical expenses, but did you know it can also be used as a long-term investment vehicle? By investing your HSA, you give your money a chance to grow, maximizing opportunities to boost your savings and prepare for the future, including retirement.

Opening an investment account is simple. Once your HSA balance reaches \$1,001.00, you may choose to invest any HSA cash dollars above this threshold.

Your current balance is \$604.22. Keep saving and once your balance exceeds \$1,001.00, we'll let you know you're eligible to invest.

Unable to invest –
minimum threshold
not met

Hi Brandon, welcome to your HSA investment experience!

Investing your HSA is a great way to maximize your earning potential, and we can't wait for you to get started. Unfortunately, your investment account can only be opened during market hours – Monday through Friday from 9:30 a.m. - 4:00 p.m. ET (except stock market holidays).

Please return to this page during market hours to create your investment account and take full advantage of all the saving opportunities your HSA delivers.

4. Accept the investment account terms and conditions.

Disclosures

According to federal regulations, you must disclose the following accordingly.
For most people, none of these will apply.

☐ I am affiliated with or work for a broker/dealer

☐ I am a 10% shareholder or director of a publicly traded company

☐ I am or an immediate family member is a current or former Public Official

☐ None of these apply (most common)

5. Choose your preferred investment method: Managed, Self-Directed, or Brokerage.

Great!

Please select your preferred Investment account type.

Managed

0.075% of investment balance charged monthly in arrears
Fee example: If you had a \$5,000 investment balance, you would be charged \$3.75 per month

Designed for novice investors who prefer to have our advisor tool automatically select and rebalance investments on an ongoing basis in accordance with their age and/or risk profile.
This account type delivers a “do-it-for-me” approach to investing.

Effort to Manage

SELECT

Self-Directed

0.033% of investment balance charged monthly in arrears
Fee example: If you had a \$5,000 investment balance, you would be charged \$1.67 per month

Designed for intermediate investors who have the desire to self-select from a menu of monitored investment options covering multiple asset classes to diversify their portfolio, and then rebalance their portfolio manually. This account type provides a balance between do-it-for-me and DIY.

Effort to Manage

SELECT

Brokerage

0.033% of investment balance charged monthly in arrears
Fee example: If you had a \$5,000 investment balance, you would be charged \$1.67 per month

Designed for adept investors who desire to perform advanced research and trading across hundreds of individual stocks and ETFs. This account type offers a hands-on, DIY approach to investing.

Effort to Manage

SELECT

6. Based on your preferred investment selection, you will be guided through a series of easy steps to either review or self-select funds, enter your investment amount(s) and begin investing.

For more information about the three investment methods, see the ‘how to’ sections below.

How to: Managed account type

What is a Managed account?

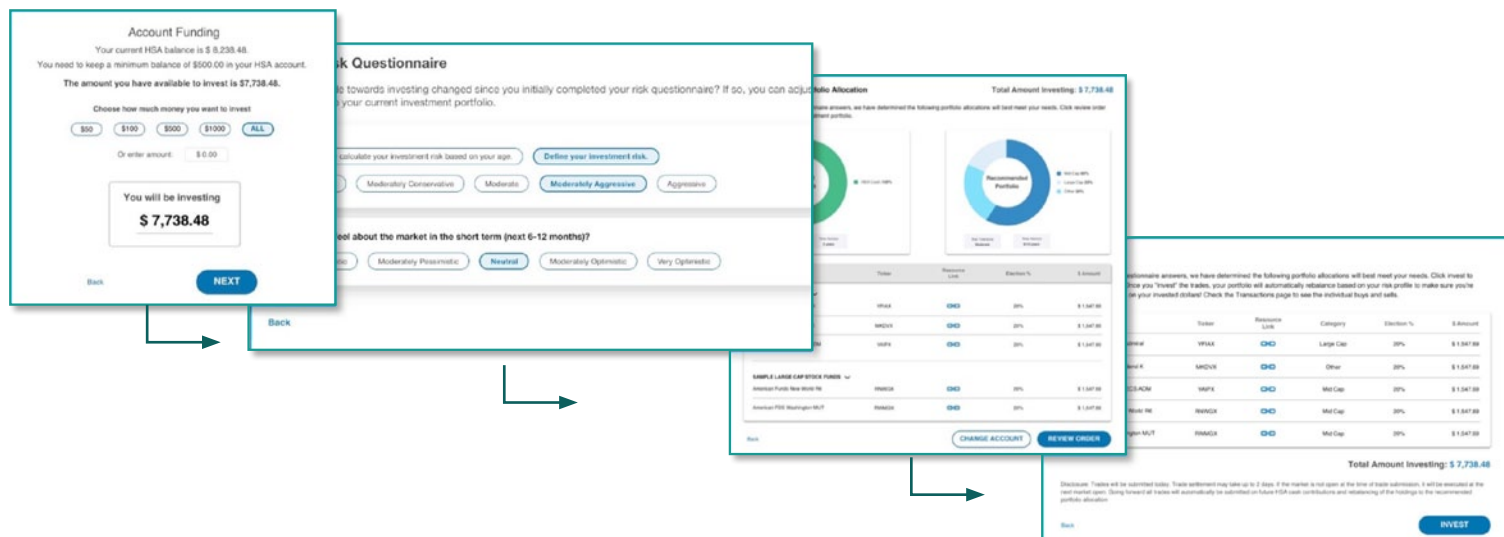

The Managed investment path is designed for novice investors who prefer to have our advisor tool automatically select and rebalance investments on an ongoing basis in accordance with their age and/or risk profile. This account type delivers a “do-it-for-me” approach to investing.

Enrolling in a Managed account

If you choose the Managed account type during the investment account opening process, the on-screen prompts guide you through the following steps to complete your enrollment:

1. **Select an amount to invest.** The amount you choose to invest is transferred from your HSA cash account into your HSA investment account after you complete your enrollment.
2. **Fill out a risk questionnaire.** Your answers to the risk questionnaire help the advisor tool determine your risk tolerance and allow it to craft a portfolio for you. You can review the suggested portfolio and either accept as-is or change your answers to the risk questionnaire to receive a different suggested portfolio.

3. **Review the order and open your account.** After clicking the 'invest' button, your investment account is opened and the investment amount you choose is allocated accordingly among the funds in the suggested portfolio.

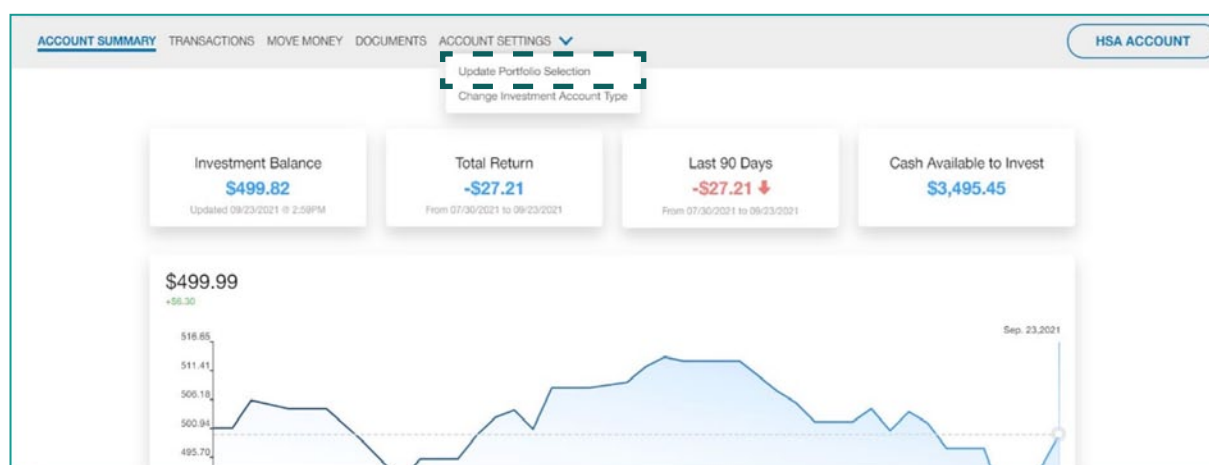

Managing a Managed account

The Managed account type eliminates most of the work associated with investing your funds. After you accept the suggested portfolio, the advisor tool regularly rebalances your portfolio for you.

Updating your risk questionnaire

To change your answers to the risk questionnaire, click on 'account settings' and select 'update risk questionnaire' at any time during market hours. Review your current answers and adjust your selections as needed. The advisor tool then suggests a portfolio that better suits your needs. When ready to accept the suggested portfolio, simply click 'invest'. Buys and sells are executed accordingly to transition from your old portfolio to your new one.

Transferring funds in a Managed account

Follow these steps to move money between your HSA cash account and your HSA investment account.

1. Click 'move money'.
2. Enter the amount you'd like to transfer.
3. Select the account you want to transfer from.
4. Select the account you want to transfer to.
5. Review the transfer request and click 'submit'.

The screenshot shows a 'Move Money' interface with the following elements:

- Move Money** header with a subtext: 'Move money to and from your investment account.'
- Step 2: A text input field labeled 'Enter the amount you would like to transfer.' with a value of '\$ 0.00'.
- Step 3: A dropdown menu labeled 'From' with the text 'Select Account' and a downward arrow.
- Step 4: A dropdown menu labeled 'To' with the text 'Select Account' and a downward arrow.
- A blue arrow pointing from the 'From' dropdown to the 'To' dropdown.
- A note: 'Note: Transfers from your HSA Investment Portfolio to your HSA Cash Account make take up to 2 business days. You can view the status of your transfer to your HSA Cash Account on your HSA Details screen.'
- A blue 'REVIEW' button.
- A link: 'Close Investment Account'.

If you're transferring money from your HSA cash account into your HSA investment account, buys are executed according to your portfolio allocations and may take up to two business days.

If you're transferring money from your HSA investment account into your HSA cash account, sells are executed according to your portfolio allocations and the money settles into your HSA cash account within two business days.

How to: Self-Directed account type

What is a Self-Directed account?

The Self-Directed investment path was designed for intermediate investors who have the desire to self-select from a menu of monitored investment options covering multiple asset classes to diversify their portfolio, and then rebalance their portfolio manually. This account type provides a balance between do-it-for-me and DIY approaches to investing.

Enrolling in a Self-Directed account

If you choose the Self-Directed account type during the investment account opening process, the on-screen prompts guide you through the following steps to complete your enrollment:

1. **Select an amount to invest.** The amount you choose to invest is transferred from your HSA cash account into your HSA investment account after you complete your enrollment.
2. **Choose your funds.** Select from a curated fund lineup – be sure to use the resource links next to each fund for additional details and research as you make your selections.
3. **Allocate your money.** Determine how you would like to allocate your money among the funds, by percentage. The total percentage must equal 100%.
4. **Review your selections and open your account.** After clicking the 'invest' button, your investment account is opened and the amount you entered is invested according to the allocations you selected.

The first screenshot, 'Account Funding', shows a user's current HSA cash balance of \$5,600.00 and a minimum balance requirement of \$1,000.00. It allows the user to choose how much money to invest, with buttons for \$500.00, \$1K, \$2K, \$4K, and ALL. A text box indicates 'You will be investing \$2,000.00'.

The second screenshot, 'Fund Distribution', shows a table of fund allocations for a total investment of \$2,000.00. The table includes columns for Fund Name, Ticker, HSA Status, and Allocation. The total allocated is 100%.

The third screenshot, 'Trade Review', shows a summary of the selected funds and their allocations. It includes a table with columns for Fund Name, Ticker, Allocation, and Amount. The total amount investing is \$2,000.00.

Managing a Self-Directed account

Unlike the Managed account type, the Self-Directed account type is not automatically rebalanced for you. If you would like to rebalance your portfolio, you may do so at any time within market hours by following these steps:

1. Click 'move money' and then 'reallocate funds'.
2. You can increase or decrease your current election % but your total allocations must equal 100%.
3. When satisfied with your allocations, click 'invest'. Buys and sells are executed accordingly to transition from your old portfolio to your new one.

Transferring funds in a Self-Directed account

Follow these steps to move money between your HSA cash account and your HSA investment account.

1. Click 'move money' and then 'transfer funds'.
2. Enter the amount you'd like to transfer.
3. Select the account you want to transfer from.
4. Select the account you want to transfer to.
5. Review the transfer request and click 'submit'.

Move Money
Move money to and from your investment account.

Enter the amount you would like to transfer.

2 \$ 0.00

Note: Transfers from your HSA Investment Portfolio to your HSA Cash Account make take up to 2 business days. You can view the status of your transfer to your HSA Cash Account on your HSA Details screen.

REVIEW

[Close Investment Account](#)

If you're transferring money from your HSA cash account into your HSA investment account, the money transfers in real time and is automatically used to buy funds according to your portfolio allocations.

If you're transferring money from your HSA investment account into your HSA cash account, sells are executed according to your portfolio allocations and the money settles into your HSA cash account within two business days.

How to: Brokerage account type

What is a Brokerage account?

The Brokerage investment path was designed for adept investors who desire to perform advanced research and trading across hundreds of individual stocks and exchange-traded funds (ETFs). This account type offers a hands-on, DIY approach to investing.

Enrolling in a Brokerage account

If you choose the Brokerage account type during the investment account opening process, the on-screen prompts guide you through the following steps to complete your enrollment:

1. After choosing the Brokerage account type, you are directed to the Brokerage account confirmation screen.
2. Click 'submit' to automatically open your investment account.
3. Search for investment instruments within the lists of popular stocks and popular ETFs, or by using the search feature.
4. When you select a stock or ETF, you can see additional information about the instrument, including performance details.
5. Enter the amount in dollars you want to buy – you can buy either full or fractional shares.

***Note:** The dollars for buys and sells move back and forth from your HSA cash account accordingly without a sweep account; you don't need to 'fund' your Brokerage account before buying instruments.

- Review the order and choose to 'edit' or 'buy'.

The screenshot displays a brokerage account dashboard. At the top, a message says "Congratulations... let's get started investing!" followed by "The amount you have available to invest is \$6,000.00". Below this, there are sections for "Frequently Traded Stocks" and "Frequently Traded ETFs". A dashed line with a circular arrow labeled '3' points from the "Frequently Traded Stocks" section to the "Apple, Inc." (AAPL) stock page. The AAPL page shows a price of \$146.67, a line chart, and a "Buy AAPL" button. A circular arrow labeled '4' points from the "Buy AAPL" button to the "REVIEW ORDER" button. A circular arrow labeled '5' points from the "REVIEW ORDER" button to the "ACCOUNT SUMMARY" button. A circular arrow labeled '6' points from the "ACCOUNT SUMMARY" button back to the "Frequently Traded Stocks" section.

Managing a Brokerage account

How you choose to build and maintain your portfolio is solely up to you. You can enter the investment experience at any time, and you can buy or sell during market hours.

Follow these steps to sell part, or all, of your holdings in an investment instrument:

- Select the instrument from your dashboard or use the search tool to find it.
- Click the arrow to select 'buy' or 'sell'.
- Enter in dollars how much you want to sell – you can sell either full or fractional shares.
- Review the order and choose 'edit' or 'sell'.

Transferring funds in a Brokerage account

Unlike Managed and Self-Directed, there is no true 'transfer' of funds in a Brokerage account. If you want to move money from your HSA cash account to your HSA investment account, you must buy investment instrument(s). If you want to move money from your HSA investment account to your HSA cash account, you must sell investment instrument(s).

The money movement for buys happens in real time. The money from sells settles into your HSA cash account within two business days.

To transfer all your investment holdings back into your HSA cash account and close your investment account, see the [switching or closing accounts](#) section of this guide.

Maximizing Your HSA investment account

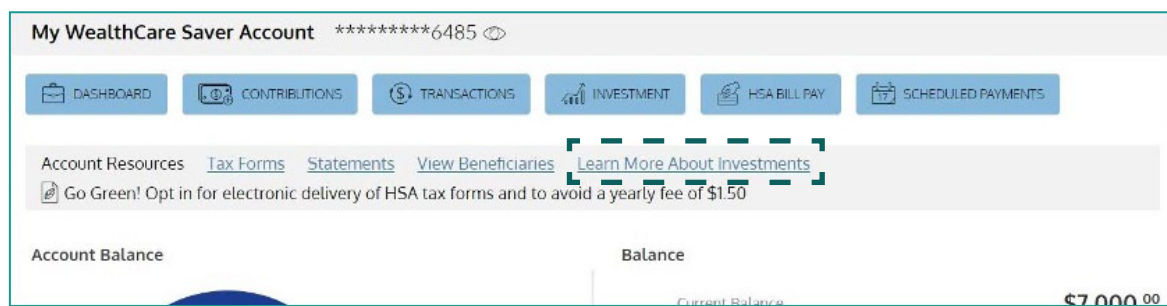

Account statements on demand

You can view your investment statements at any time by selecting 'documents', then expanding the 'monthly statements' to choose which statement you want to view.

Tools and education

You have access to a variety of educational tools and resources designed to help you better understand the benefits of investing your HSA funds as well as provide information about the various investment options available to you.

Simply log in to your HSA portal, navigate to your HSA account summary and click on the 'learn more about investments' link.

Switching or closing accounts

Zeroing out your investment balance

You must zero out your investment balance by selling all your investments (per the steps below) before switching investment account types or closing your investment account.

To zero out your investment balance in the Managed account type:

1. Click 'move money'.
2. Enter your total investment balance.
3. Select the account you want to transfer from as your HSA investment account and the account you want to transfer to as your HSA cash account.
4. Review the transfer request and then click 'submit'.

To zero out your investment balance in the Self-Directed account type:

1. Click 'move money' and then 'transfer funds'.
2. Enter your total investment balance.
3. Select the account you want to transfer from as your HSA investment account and the account you want to transfer to as your HSA cash account.
4. Review the transfer request and then click 'submit'.

To zero out your investment balance in the Brokerage account type:

1. Click into an instrument within your portfolio from your dashboard.
2. Change setting from 'buy' to 'sell'.
3. Check the 'do you want to sell your entire position?' box.
4. Review order and sell.
5. Repeat until you have sold all your positions.

Keeping trade confirmations

Once you close an investment account you are unable to access it again. If there is anything you want to save, such as your transaction history or trade confirmations, make sure it is saved prior to closing your investment account.

In the Brokerage account type, selling your investments before closing your investment account isn't required. Simply follow the instructions in the [closing your account](#) section to automatically sell all your holdings and close your investment account. However, if you want to keep your trade confirmations for your records, you may want to sell your investments before closing your investment account.

Switching account types

You must zero out your investment balance before switching investment account types.

To switch account types, follow these steps:

1. Click 'account settings'.
2. Click 'change investment account type'.
3. Click 'submit'.

The screenshot shows the 'ACCOUNT SETTINGS' tab in a web application. Under the 'ACCOUNT SETTINGS' dropdown, the 'Change Investment Account Type' option is highlighted with a red box. Below this, there are four summary cards: 'Investment Balance' at \$2,005.67, 'Total Return' at -\$8.26, 'Last 90 Days' at -\$3.64, and 'Cash Available to Invest' at \$1,997.98. A line chart below these cards shows the investment balance over time, with a peak of \$2,005.93. An arrow points from the 'Change Investment Account Type' option to a confirmation dialog box on the right.

Do you want to change your Investment Account Type?

In order to change your account, you will need to liquidate your existing investments. You will then be able to select a new investment account type.

You will no longer have access to this investment account and your account will be closed. If you do want to close your account, please ensure you have saved any necessary documents, disclosures, etc.

Note that you will not be able to cancel after clicking "Proceed."

PROCEED

Note that by switching your investment account type, you are closing your current investment account. Once you click 'submit' to switch your investment account type, you can no longer access your investment account. The investment account is immediately closed in real time, which means you are unable to cancel the investment account closure request.

Closing your account

You must zero out your investment balance before you can close your investment account.

To close a Managed account type:

1. Click the 'move money' menu item.
2. Click the 'close investment account' link at the bottom of the screen.
3. Click 'submit' on the next screen.

To close a Self-Directed account type:

1. Click the 'move money' menu item then click 'transfer funds'.
2. Click the 'close investment account' link at the bottom of the screen.
3. Click 'submit' on the next screen.

To close your Brokerage investment account:

1. Click 'account settings'.
2. Click 'close investment account'.
3. Click 'submit'.

Regardless of which investment account type you have, once you close your investment account, you can no longer access it. The investment account is immediately closed in real time, which means you are unable to cancel the investment account closure request.

The image displays two screenshots from a web application, connected by a large teal arrow pointing from left to right.

Left Screenshot: Move Money

- Title: **Move Money**
- Subtitle: Move money to and from your investment account.
- Form: A transfer form with a field "Enter the amount you would like to transfer:" containing "\$ 0.00". Below this are two boxes labeled "From" and "To", each with a "Select Account" dropdown menu. A blue arrow points from the "From" box to the "To" box.
- Footer: A note states, "Note: Transfers from your HSA Investment Portfolio to your HSA Cash Account make take up to 2 business days. You can view the status of your transfer to your HSA Cash Account on your HSA Details screen."
- Buttons: A blue "REVIEW" button and a dashed box containing a link "Close Investment Account".

Right Screenshot: Do you want to CLOSE your Investment Account?

- Title: **Do you want to CLOSE your Investment Account?**
- Text: "By submitting, you will no longer have an Investment account. In the future you will have the option to open a new investment account."
- Note: "Please note once submitted you will not be able to cancel this action."
- Buttons: A large blue "SUBMIT" button and a smaller "Cancel" link.
