Bystander Intervention Training

A Program for Oberlin College Students

By PRSM (Preventing and Responding to Sexual Misconduct) through the Office of Equity, Diversity, and Inclusion
Continuum of Violence

From National Sexual Violence Resource Center

<table>
<thead>
<tr>
<th>Healthy, age-appropriate, mutually respectful &amp; safe</th>
<th>Mutually flirtatious &amp; playful</th>
<th>Age-inappropriate or non-mutual</th>
<th>Harassment</th>
<th>Sexually abusive &amp; violent</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
<td>5</td>
</tr>
</tbody>
</table>

Choose a number on the above scale to answer the following questions:

When is direct intervention appropriate?
When is it time to call a paid staff person to intervene?
How do we know when something becomes non-mutual?

Essential Elements of Consent

Informed
Mutually Understandable
Specific to a Given Situation
Freely and Actively Given

## Questions and Scoring System

<table>
<thead>
<tr>
<th>Questions</th>
<th>Scoring System</th>
<th>Your Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>How often do you have a drink containing alcohol?</td>
<td>Never, Monthly or less, 2-4x per month, 2-3x per week, 4+ per week</td>
<td></td>
</tr>
<tr>
<td>How many units of alcohol do you drink on a typical day when you are drinking?</td>
<td>1-2, 3-4, 5-6, 7-9, 10+</td>
<td></td>
</tr>
<tr>
<td>How often have you had 6 or more units if your body has more estrogen, or 8 or more if your body has more testosterone, on a single occasion in the last year?</td>
<td>Never, Less than monthly, Monthly, Weekly, Daily or almost daily</td>
<td></td>
</tr>
<tr>
<td>How often during the last year have you found that you were not able to stop drinking once you had started?</td>
<td>Never, Less than monthly, Monthly, Weekly, Daily or almost daily</td>
<td></td>
</tr>
<tr>
<td>How often during the last year have you failed to do what was normally expected from you because of your drinking?</td>
<td>Never, Less than monthly, Monthly, Weekly, Daily or almost daily</td>
<td></td>
</tr>
<tr>
<td>How often during the last year have you needed an alcoholic drink in the morning to get yourself going after a heavy drinking session?</td>
<td>Never, Less than monthly, Monthly, Weekly, Daily or almost daily</td>
<td></td>
</tr>
<tr>
<td>How often during the last year have you had a feeling of guilt or remorse after drinking?</td>
<td>Never, Less than monthly, Monthly, Weekly, Daily or almost daily</td>
<td></td>
</tr>
<tr>
<td>How often during the last year have you been unable to remember what happened the night before because you had been drinking?</td>
<td>Never, Less than monthly, Monthly, Weekly, Daily or almost daily</td>
<td></td>
</tr>
<tr>
<td>Have you or somebody else been injured as a result of your drinking?</td>
<td>No, Yes, but not in the last year, Yes, during the last year</td>
<td></td>
</tr>
<tr>
<td>Has a relative or friend, doctor or other health worker been concerned about your drinking or suggested that you cut down?</td>
<td>No, Yes, but not in the last year, Yes, during the last year</td>
<td></td>
</tr>
</tbody>
</table>

### Total Score: __________

#### What your score means:
- 0–7: Lower risk of harmful alcohol use
- 8–15: Increasing risk of harmful alcohol use
- 16–19: Higher risk of harmful alcohol use
- 20 or higher: Possible alcohol dependence

# What Does Blood Alcohol Content Level Really Mean?

<table>
<thead>
<tr>
<th>BAC Level</th>
<th>Effects from Alcohol</th>
</tr>
</thead>
<tbody>
<tr>
<td>0.02–0.03 BAC</td>
<td>No loss of coordination, slight euphoria, and loss of shyness. Mildly relaxed and maybe a little lightheaded.</td>
</tr>
<tr>
<td>0.04–0.06 BAC</td>
<td>Feeling of well-being, lower inhibitions, and relaxation. Judgment is slightly impaired. Minor impairment of reasoning and memory, and less cautious. Your behavior can become exaggerated and emotions (ex. happiness or sadness) felt more intensely.</td>
</tr>
<tr>
<td>0.07–0.09 BAC</td>
<td>Impairment present in everyone. Driving skills such as vision, steering, lane changing, and reaction time are impaired along with balance, speech, and hearing. Feelings of euphoria in some. Self-control and caution are reduced. Riskier behaviors displayed. Judgment, reason, and memory suffer. You are likely to believe that you are functioning better than you really are.</td>
</tr>
<tr>
<td>0.08 BAC</td>
<td>is legally impaired and it is illegal to drive at this level.</td>
</tr>
<tr>
<td>0.10–0.12 BAC</td>
<td>Significant impairment to motor coordination and loss of good judgment. Speech may be slurred; balance, vision, reaction time, and hearing will be impaired. Probably not thinking straight.</td>
</tr>
<tr>
<td>0.13–0.15 BAC</td>
<td>Very obviously drunk. Severe impairment to judgment, perception, and major motor skills. Very slow reaction time. Blurred vision, loss of balance, and slurred speech. Feelings of well being starting to be replaced by anxiety and restlessness (dysphoria). Vomiting common.</td>
</tr>
</tbody>
</table>

**At 0.15 BAC you are 380 times more likely to be in a fatal crash than you are sober.**

<table>
<thead>
<tr>
<th>BAC Level</th>
<th>Effects from Alcohol</th>
</tr>
</thead>
<tbody>
<tr>
<td>0.16–0.19 BAC</td>
<td>The drinker has the appearance of a “sloppy drunk.” At this point, most drinkers begin to feel incapacitated. Many social drinkers will pass out. Nausea begins to set in and the drinker has difficulty focusing on any object.</td>
</tr>
<tr>
<td>0.20 BAC</td>
<td>Out of it. Confused. Dizzy. Requires help to stand or walk. If injured may not feel the pain. Nausea and vomiting. The gag reflex is impaired and you can choke if you do vomit. Blackouts are likely.</td>
</tr>
<tr>
<td>0.25 BAC</td>
<td>All mental, physical, and sensory functions are severely impaired. Near total loss of motor function control. Increased risk of asphyxiation from choking on vomit and of seriously injuring yourself by falls or other accidents.</td>
</tr>
<tr>
<td>0.30–0.40 BAC</td>
<td>Extremely life threatening. You have little comprehension of where you are. You may pass out suddenly and be difficult to awaken. Complete unconsciousness. Coma is possible. This is the level of surgical anesthesia. Death may occur.</td>
</tr>
<tr>
<td>Over 0.45 BAC</td>
<td>death will occur in most people.</td>
</tr>
</tbody>
</table>

Although there’s no strict limit for consent like there is for driving, how can we think about drinking and consent under the influence similarly?

If alcohol impairs our judgment and reason, how would your intoxication level affect your ability to judge someone else’s level of intoxication?
That’s a cool chart, but how does alcohol work in my body?

It takes 20–30 minutes to feel the maximum effect of one drink, and about 45–60 minutes for the drink to leave the system.

This matters because the effects of alcohol are cumulative—someone might not be incapacitated when you start kissing, but then they are 20 minutes later!

There are a lot of factors that affect how drunk someone gets on a given night. A few are:
- how much they’ve eaten prior to drinking
- strength of the alcohol (beer vs hard liquor)
- their weight
- any medications that may interact with alcohol
- other drug interactions
- the speed of consumption
- hormones

Most of these are not factors you can know as an observer, so you never really know how someone is processing alcohol one night in comparison to a different night.

Some people are verbal and seem to be functioning physically even when they are in a state of “blackout” or “brownout” (when the brain stops coding short-term memories into long-term memory. As in, “I was so drunk, I can’t remember what happened last night!”).

People exhibit intoxication and incapacitation differently, and sometimes it’s impossible to know just by looking at them (or even talking to them!).

This means checking in early and often if you are going to be intimate or sexual with someone who has been drinking. Check in with them and yourself, and if you’re unsure about anything, wait until you can both communicate clearly and are uninhibited by substances.
What Does Victim Blaming Sound Like?

Were they drinking?

How much? Did they seem drunk?

What were they wearing?

Why did they leave their friends?

Were they flirting?

Why didn’t anyone stop them?

Do they have a lot of partners?

Do they know their perpetrator?

Didn’t they know this would happen?

Is it their fault?

...

Even if there are a lot of questions, there is only one answer:

A survivor is never to blame for their assault. Ever.

How to Act: 5 Steps to Intervention

1. Notice
Notice the event along the continuum of violence

2. Consider
Consider whether the situation demands action

3. Decide
Decide if you have a responsibility to act

4. Choose
Choose what form of assistance to use

5. Understand
Understand how to implement the choice safely

How does your identity affect the above steps?
Definitions

**POWER**

Access to resources and systems that facilitate the self-definition of one’s reality and lived experience as normal. Having institutional power benefits those who are part of the defined norm and also includes the ability or capacity to influence/control access to resources as well as the behaviors of others.

**PRIVILEGE**

Privilege operates on personal, interpersonal, cultural, and institutional levels and gives advantages, favors and benefits to members of dominant groups at the expense of members of target groups.

**OPPRESSION**

A systemic social phenomenon based on the perceived and real difference among social groups that involves ideological domination, institutional control, as well as the promulgation of the oppressors ideology, logic system and culture to the oppressed group. The result is the exploitation of one social group by another for the benefit of the oppressor group. The act of upholding and reinforcing authority and power is an exercise of oppression.
Social Identity Wheel

1. Identities you think about most often
2. Identities you think about least often
3. Your own identities you would like to learn more about
4. Identities that have the strongest effect on how you see yourself in person

How do these identities impact how you would intervene? Does it depend on context and setting? If an identity presents a barrier to intervening, how would you overcome or go around that barrier?
When can you be an active bystander in your daily life?

What student organizations, teams, classes, etc. are you part of that would benefit from a culture of active bystander intervention?

How do you like to intervene? Are you more direct or indirect? What are the benefits to both approaches?
Reporting Sexual Misconduct at Oberlin

Do you want to report the misconduct?

- Yes
  - There are a lot of different people you can report to, including the Title IX Coordinator, Safety & Security, and the Oberlin Police Department.

- No
  - That’s okay! Though everyone is encouraged to report, you don’t ever have to report if you don’t want to. You can choose to report at any time. You always have access to confidential counseling and support services on and off campus.

Do you want to identify yourself?

- No
  - If you report a potential felony, under Ohio law the College is legally bound to contact the police. If you have identified yourself, you will get an email, or other contact, from the police to offer help.

- Yes
  - That’s okay! To seek confidential support, you can go to the Office of Religious & Spiritual Life, Counseling Center, Lorain County Rape Crisis, or on-campus Confidential Advocate.

Meet with the Title IX Coordinator to discuss your needs. You can have a support person with you during the meeting and/or at any other time during the process.

That’s okay! You can still receive support from the College if you’d like it.

Informal resolutions are voluntary and identify measures to stop the harassment and/or misconduct. More likely than not, a disciplinary process will not go forward. It is possible that in rare instances the College may choose to take disciplinary action if there is a concern for campus safety. If this happens, you do not have to take part in the process.

Do you want to tell the College what happened?

- No
  - Do you want the College to take disciplinary action?
    - No
      - Investigation
    - Yes
      - Hearing

- Yes
  - Disciplinary Action
Resources

If you or someone you know has experienced sexual misconduct, or if you just need someone to talk to, there are a variety of places and people who can help.

**Emergency Assistance**

911 Emergency Services
Oberlin College Safety & Security (440) 775-8911 (24 hour)
The Nord Center Sexual Assault Care Unit (800) 888-6161 (24 hour hotline)
Lorain County Rape Crisis (800) 888-6161 (24 hours)
Lorain County Mental Health Crisis Hotline (800) 888-6161 (24 hours)

**Confidential Resources & Support**
