Frequently Asked Questions

We know that health care can be confusing. Here are some of the most frequently asked questions about the new plan options.

How can I enroll in the CDHP with HSA?

To be eligible for HSA funding from Oberlin College, you must complete an annual biometric screening and a health risk assessment.

How can I increase the College's contribution to my HSA?

Under the CDHP, you can complete voluntary *health actions* to earn additional contributions to your HSA. Examples of health actions include seeing your primary care physician annually for a preventive care visit or participate in Lifestyle coaching through Medical Mutual.

How are the differences in prescription drug cost sharing going to affect me if I switch to the CHDP?

Under the CDHP, most prescription drugs are subject to the deductible rather than a fixed co-pay. The College's contributions to your HSA will help defray those costs. You will no longer have a fixed price for a given tier of prescription drug, but a percentage, or share, of the actual prescription drug cost.
