

Summary of Policy Changes (2022-2023)

- **Mailroom Regulations**
 - Charge per item of sending over 10 mail items has been removed.
- **ID Card Policy**
 - Additions of terms for Mobile ID.
- **CIT Policy**
 - The previous version of this policy specified the acceptable use of discrete Information Technology resources (e.g., what or what not to do in computer labs, with software and software licenses, or when using networks and servers). The 2022 revision shifts that focus to a more general set of user responsibilities and prohibitions focused on security and appropriate use of data that seeks to support equitable technology access for everyone.
